Senior Cats Waiver (Age 12+)

Many senior cats would benefit from boarding with a medical facility, this is especially true for cats with existing health conditions, chronic ailments, disease or disability of any type (stable or not). Change in a cat's environment or stress can amplify existing ailments and potentially can bring forth symptoms of undiagnosed/untreated existing conditions. Cats that are boarded may not eat for several days which could lead to serious kidney/liver/heart issues. If your senior cat is taking medications to keep them stable or may be near end-of-life we highly recommend looking for in-home boarding or boarding your cat at a medical facility.

Purrfect Cat Boarding is not a medical facility. Purrfect Cat Boarding does not do a health check for your cat at drop off. We do not weigh cats daily and cannot guarantee that your cat will want to eat, drink or use the litter box regularly while it is being boarded.

New customers boarding senior cats (age 12+) will be required to show proof of a wellness check within three months of boarding. If your senior cat is on medication, a picky eater or easily stressed please discuss a prescription appetite stimulant with your vet. It is very important that all cats maintain a healthy diet while boarding and having access to a stimulant allows our staff to immediately address any issues with diet instead of trying to coordinate a vet visit while you are away. If you are unable to have your cat seen by your vet prior to boarding we will require proof of a current vet and written authorization to discuss care for your cat while you are away.

Before your travels please ensure the following

- Provide Purrfect Cat Boarding with a good contact number that we could reach while you are away. In addition, a local emergency contact that is aware of your travels is also helpful if we cannot reach you (required if you will not be available by phone).
- Contact your vet and let them know the dates your cat will be boarding with us. Please instruct them that we can discuss medical information and schedule care if needed on your behalf while away.
- Sign the Purrfect Cat Boarding boarding agreement and provide us with a dollar amount you are willing us to spend on your behalf in case of emergency. Please be aware hospitalization can run in excess of \$5000.
- Provide Purrfect Cat Boarding with your end of life decision (resuscitation or not) in case of emergency

Purrfect Cat Boarding has the right to deny boarding to any cats that we deem unfit for boarding at our facility. I understand that boarding senior cats may increase the risk of a medical situation that will require a vet/animal hospital visit. Purrfect Cat Boarding cannot guarantee that my cat will eat its normal diet while in its care and I will make every attempt to get a wellness check done for my cat prior to boarding.
